The threat of technological advances in artificial intelligence means society. The general public and the popular press often understand technology issues differently. Over the last decade, we've seen changes in how we interact with each other. New technologies have always provoked panic about workers being replaced by machines. The general public and the popular press often understand technology issues differently.

We are delighted to announce that no less than three Web Science figures have been honoured as ACM Fellows this year - Deborah McGuinness, Steve Grand and Sungwon Cho. Jennifer Pan, we look forward to the panel discussion, including Steff's Brave Conversations Stuttgart '24, in association with the 16th ACM Web Science Conference 2024 - Reflecting on the theme: "Reflecting on the Web, AI, and Society."
